WHAT IS QUILTBUM?

QuiltAlbum is an easy-to-use way to store important information about your quilts - when they were made, who designed them, what methods were used etc. - and to keep photographs you have taken of your quilts. So you will always have a stored memory of your quilts even if you give them away to family or friends.

QuiltAlbum also provides easy tools to print out those photos and information - as pages to be kept in an album (or a three-ring binder); as greeting cards in a wide variety of formats; or even as images to use on personal business cards you can use with your friends! You have different ways of controlling what information is printed, the color of the text, and what is printed. You can also print a complete summary of everything in your QuiltAlbum, perhaps as an index to your printed album.

You have spent many hours creating your quilts. Now you can use QuiltAlbum to yourself and your family to create a lasting and complete record. QuiltAlbum is a database that keeps all that important information in one place and makes it simple to print it out in different ways for different purposes.

You can also use QuiltAlbum to store information about quilts you admire that you have found in magazines or that have been made by your friends, that is, as a kind of reference book.

MAKE A CONTRIBUTION? [Click Here](#)
(you must be online!)

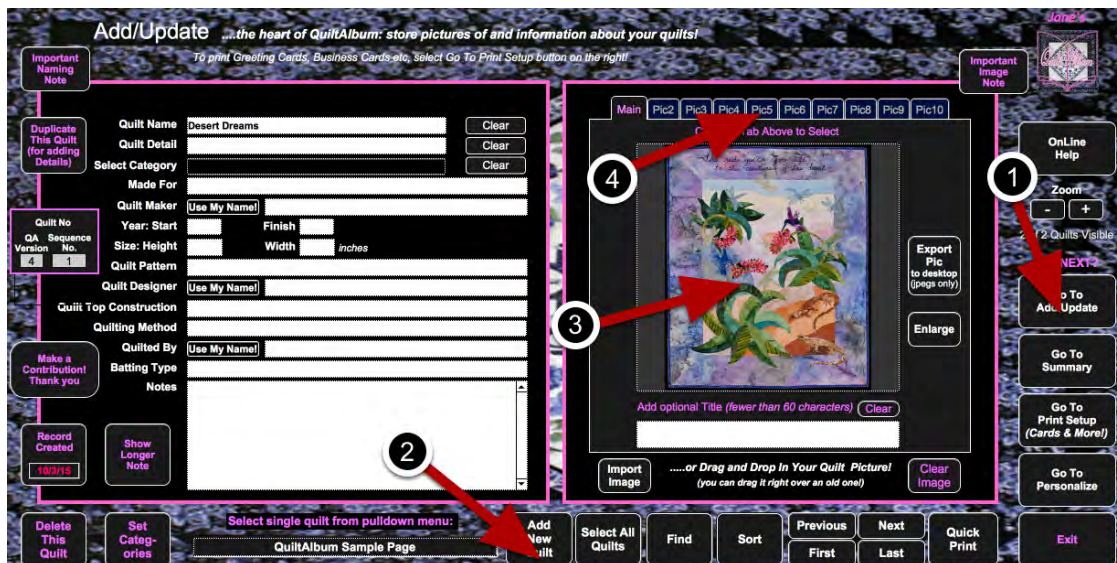

Just started? Go next to Quilts using the Go To Add/Update button.

QUESTIONS? Click Here to Contact QuiltAlbum
(you must be online!)

After registration, you will be taken to the Personalize page, where you can add other information if you wish (1) (you may have entered some of the information during Step 1) - such as might be needed if you plan to use QuiltAlbum for business cards or return address labels. Note the 4

buttons on the right (2): these are your key controls to be take you to the various sections of QuiltAlbum and they will appear on every page of QuiltAlbum.

Step 3: Add Your First Quilt

Click the Add/Update button (1). This takes you to the Add/Update section, the heart of QuiltAlbum where you add information about your quilts. To add a quilt, click the Add New Quilt button (2) at the bottom. A window will pop up where you will need to enter the title of your quilt (you can always change title later). Then click OK. Now open the folder containing the picture of your quilt, and drag and drop the picture into the big empty space on the right of your QuiltAlbum page (3). If you make a mistake, just drag and drop the correct picture over the wrong one.

By clicking the tabs above your picture (4), you can add other pictures of your quilt - perhaps representing different stages during its construction. And you can add separate captions for each picture.

Step 4: Fill In The Quilt Information

The image shows a screenshot of a web form for entering quilt information. The form is titled "Step 4: Fill In The Quilt Information". It contains several input fields and buttons. A red arrow points to a button labeled "1" in a circle, which is located next to the "Use My Name!" button for the "Quilt Designer" field. The form fields are as follows:

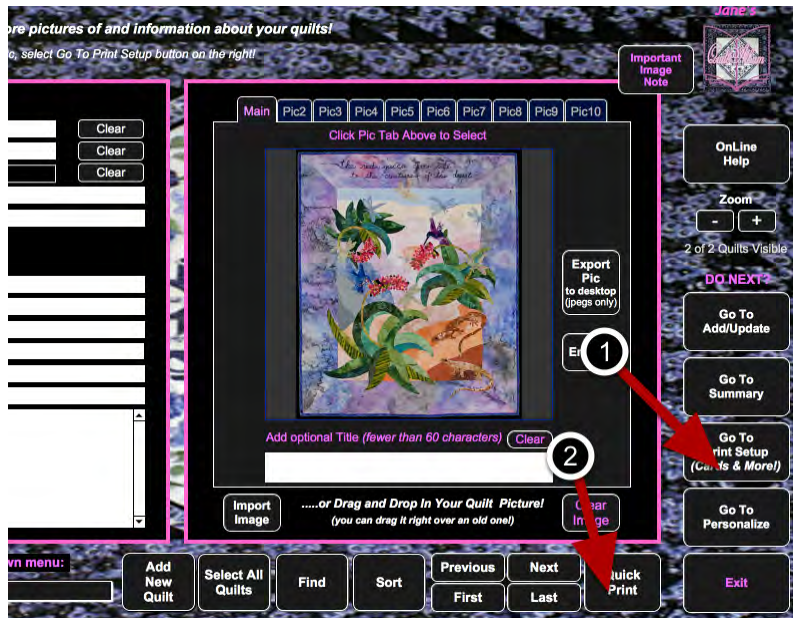

Quilt Name	Desert Dreams	Clear
Quilt Detail		Clear
Select Category		Clear
Made For	Challenge Quilt	
Quilt Maker	Use My Name! Jane Quilter	
Year: Start	2014	Finish 2015
Size: Height	60	Width 40 inches
Quilt Pattern		
Quilt Designer	Use My Name!	
Quilt Top Construction		
Quilting Method		
Quilted By	Use My Name!	
Batting Type		
Notes		

On the left side of the form, there are several buttons and text elements:

- A button labeled "Duplicate this Quilt (adding details)"
- A button labeled "Quilt No. Sequence No. 1"
- A button labeled "Make a contribution! Thank you"
- A button labeled "Record created 03/15"
- A button labeled "Show Longer Note"

Now on the left side of the page, fill out as much information about your Quilt as you wish (1). You can change or add to this at any time, so don't worry if you can't remember all the details right away!

Step 5: Print Your First Album Page

The button on the right, Go To Print Setup (1), allows you to use your Quilt picture and information in many ways - from printing out formatted pages for your album to printing greeting cards or postcards using that information, or printing labels for your quilts, and more. In the Print Setup section you will also find formats that support the printing of additional pictures you may have added to your quilt page!

When new to QuiltAlbum, however, you may first want to just use the QuickPrint button (2) at the bottom of the Add/Update Quilts page and select the Print Now option from the window that pops up. This will print a nicely formatted page for your personal quilt album of the picture of your quilt and all the data you have entered.

And There's More!

QuiltAlbum is very flexible allowing you complete control over your information and how it looks when you print it out. For more information on how to use QuiltAlbum please make extensive use of the Online Help button that is on every page and that will provide a complete rundown of how to make use of what is available on any particular page!

And also, do experiment! You will not harm anything by trying out different buttons and options. For example: do you want to change the background that appears on every page of QuiltAlbum? Just go to the Personalize page, using the section button on the right, then click the Customize Background button on the right. You will see what to do from there!

And do explore all the different options in the Print Setup section, using the dropdown menu to select the different formats.
